Stalks With Ears On

Are What Count

AN ACRE OF CORN planted in check rows with a three foot, six inch planter, has 3,556 hills. Now if only one stalk in each hill produces a ten ounce ear, the yield per acre will be about thirty-two bushels, which is about the average yield in the corn belt. If all three stalks produced a ten ounce ear the yield would be tripled.

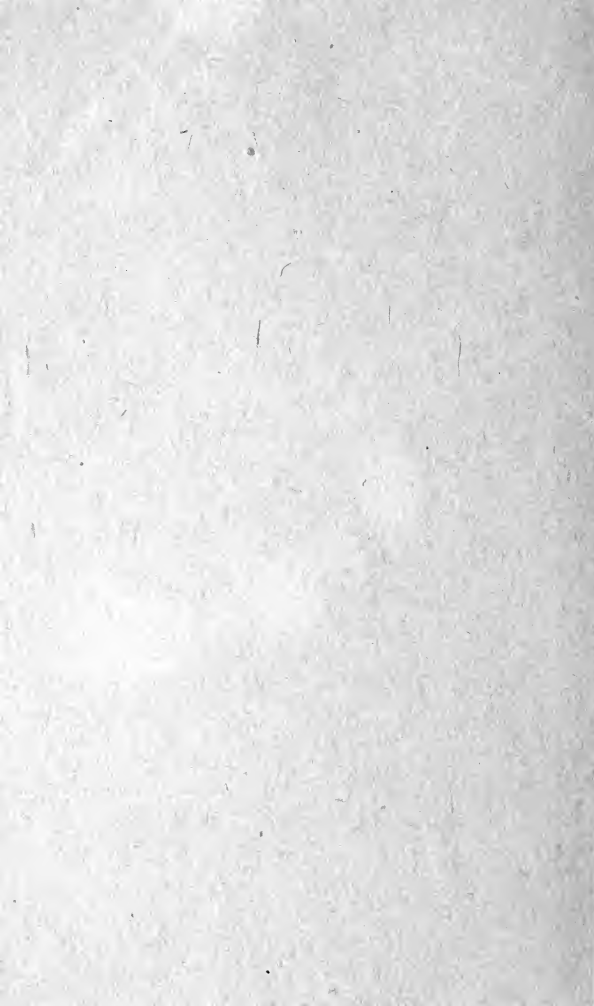

WE DO NOT CLAIM that it is possible to make every hill produce three stalks and each stalk a good ear, but by careful breeding and selecting it is possible to eliminate almost all those weak, barren stalks and have a corn that will produce an ear on every stalk as large as possible, considering the care and management used in growing it and the soil and climatic conditions.

OUR CORN has been bred along that line for thirty years to produce an ear on every stalk and just as large an ear as possible for the soil, season, care and attention given it. A corn that is not too early or not too late, it just uses up the growing season. A corn that is not too small or not too large, just a medium, all around, good corn. It is not always the corn with the biggest ears that makes the greatest yield, but it certainly is the stalks with ears on that count. It takes ears to make bushels, it takes bushels to make dollars. Let us send you enough seed for one of your fields and we know you will have more ears, more bushels, more dollars.

Seed Corn Breeders and Growers

Haughville Sta., INDIANAPOLIS, IND.

Klingensmith's Yellow Dent

DESCRIPTION

Klingensmith's Yellow Dent Seed Corn has a medium size ear from 9 to 10 inches in length and 7 to 7½ inches in circumference; the cob is very small and grains very deep, having from 16 to 22 rows of grain to the ear. It is a medium early corn maturing in from 95 to 110 days, owing to the season. Stalks are of medium size and height. Tips and butts are well filled.

It is a superior corn for feeding, as the cob is so small that it dries out quickly in the fall and leaves the germ perfect and sweet.

It keeps in the crib. It's a good yielder 70, to 100 bushels, and you get well matured corn—not sappy, mouldy stuff. It has a rich yellow color and will shell a very high per cent. of corn in proportion to the cob. It's not too small, not too large, not too early, not too late; it just uses up the average growing season in fully maturing.

PRICE—\$4.00 Bu., Shelled

Let us hear from you. If there are any questions you would like to ask, write us.

KLINGENSMITH'S

Seed Corn

Our Seed Corn has the breeding back of it to produce a yield and quality of corn far above the average. Our seed not only looks good in the seed stock, but will make good in your fields. It has life and vigor and will start to work as soon as planted to produce a good healthy stalk with an ear on it.

Our Seed Corn comes to you on a guarantee to please you in every way. You can have 10 days to test it out and if for any reason you are not satisfied, you can return and your money will be refunded. We offer you the best seed corn that time and money will produce at a price that is right. Let us send you enough seed for one of your fields; we know you will have more ears, more bushels, more dollars.

Klingensmith's Yellow Dent Seed Corn

Seed prepared in our usual careful manner is offered at the following prices, which we believe are very reasonable; in fact, below the prices asked by others for seed of like quality. We invite a comparison of our seed with any other offered you at the same or higher prices.

Shelled Corn, per bushel.....	\$2.00
Shelled Corn, per half bushel.....	1.25
Nice Ear Corn, per bushel.....	2.50
Fine Select Ears, per bushel.....	3.00
Fine Select (deep grain) Shelled, per bushel.....	3.00
Sample Ears, prepaid.....	.25

Johnson County White or Reid's Yellow can usually be furnished at same prices, if desired.

Bags, Boxes and Crates are Free.

OUR GUARANTEE.

All our Seed Corn is guaranteed to show first-class test of germination and to be of the high quality represented. We stand ready and willing to return your money if our seed does not come up to these conditions; providing, you notify us and return the seed to us within ten days after it reaches you.

A WORD FROM OUR BANKER.

Indianapolis, Indiana.

To Whom It May Concern:

It gives us great pleasure to recommend to your consideration the firm of E. J. Klingensmith & Company, who have done business with us for a number of years and whose account has at all times been satisfactory. They not alone represent considerable financial responsibility, but their standing in their community is of the very best and we believe that any contracts entered into by them will be fulfilled.

Yours respectfully,
WM. K. SPROULE, Cashier,
National City Bank of Indianapolis.

HOW OUR CORN MAKES GOOD.

Mr. O. E. Robinson, of Winchester, Ind., when he received his corn, wrote:

"The seed corn came promptly and on opening it up was surprised to see such a small cobbed variety and such deep and well-shaped grains. Believe this is what I am looking for, as my corn is too large, take one season with another."

In the fall, after gathering his crop, he wrote:

"The seed corn I purchased of you gave me a good, even stand and a fine crop. It was pretty dry here, but I would be safe in saying that it made 80 bushels per acre. I believe it will shell more corn per bushel than any corn I know of."

Mr. John Elliott, of Vincennes, Ind., said:

"I received the corn today, and was somewhat surprised. It looked better than the sample. If it will do as well as it looks, I will have good corn this year."

Mr. T. E. Ketch, of Mt. Blanchard, Ohio, wrote:

"Received corn yesterday. It looks good enough that a neighbor wants me to ask you if he can get a bushel."

From Mr. W. R. Dunbar, Delaware, Ind.:

"Having bought seed corn of you two years ago which gave good satisfaction and knowing I can depend upon the quality and germination of your seed I enclose my order for this year."

We sent two shipments to Mr. A. Wirth, of Bethany, Ill. He wrote:

"Received second shipment today. Am well pleased with my seed corn that you shipped me. It looks fine and it is as nice as sample."

Mr. Lannings, of Nowata, Okla.:

"The nicest corn I ever saw. I will want more."

Mr. Mace, of Greenville, Ohio:

"The seed corn is very satisfactory indeed."

Mr. R. P. C. Miller, of Somersville, Ind., wrote:

"Enclosed find order for seed corn. I expect good seed, but I know from your recommendations that you will treat me right."

Mr. F. J. Isch, Bluffton, Ind.:

"I received the sample ear of corn and it looks good to me. I want five bushels in the ear. Enclosed find check."

Let Us Hear From You.
